

Ethical Property Management

As a social enterprise, EPM assists people from refugee backgrounds with employment and training opportunities in the pest industry. Since 2004, Afghan former-refugees like Ali have gained sustainable employment with EPM, significantly contributing to their family's future and security in Brisbane.

Our mission is to deliver pest management services of the highest possible standard and in so doing contribute to the enhancement of our community and the environment.

EPM Pest Control Services is a 4 year old pest management company based in Brisbane offering professional, competitively priced pest prevention services.

We specialise in general pest management, servicing predominantly commercial clients, across a broad range of industries including property management companies, apartment complexes, community and church organisations, restaurants, cafes and more.

With our central office located in the inner city suburb of West End we are able to provide a fast and efficient rate of response to multiple service calls and required follow-up work.

EPM can offer your agency professional, safe and people friendly pest control services. Using a combination of non-chemical pest prevention methods, residual treatments and baiting systems, we provide management programs designed to deter pests such as cockroaches, spiders, ants, rodents, termites, flying insects and other pests.
